16 April 2014

**Constellation Computers**

Dear Gerald

On 07 April 2014, our Administration Computer which contains all our Pastel Accounting information and company documentation developed a critical virus. Access to Pastel was impossible.

We, Ninety Degrees Steel (Pty) Ltd subscribed to Constellation's Software Insurance in March 2013. Subscribing to this insurance meant, we were able to arrange a call out and due to my not being in office on that specific day, the IT staff was able to restore our Administration Computer.

On my return to the office after 14h00, I was able to continue my work and all my documentation was intact and we were able to restore all backups needed. It would usually take hours, if not days, to re-install an operation system.

With this software insurance program, there were no costs involved to restore our computer. Constellation Insurance has already paid for itself for the next few years and comes highly recommended.

Kind regards,  
Tania Dirks  
Administrative Secretary
